Seal

Planning information

Provide sufficient ventilation below the gas hob. Either via the carcass front (opening cross-section > 50 cm²) or via the plinth area - opening cross-section > 150 cm².
Provide a return air opening (opening cross-section > 1000 cm²) per air purification unit) for the return of recirculated air in the plinth area.
Observe the locally applicable regulations and connection conditions for gas hobs.
Observe the special installation and processing guidelines for the PKG3 gas hob (see operating and installation instructions).
When operating the gas hob with a hob extractor, the gas flame may be affected (depending on the level of the power stage on the hob extractor).
The PKG3 gas hob is SVGW-certified (No. 19-027-1). Observe the locally applicable regulations and connection conditions for gas hobs.
